## OBJECTIVE

Motivated web developer with 10 years of progressive experience in the web development industry. Offering expertise in HTML, CSS and PHP, with aptitude in JavaScript. Energetic self-starter and team builder able to navigate high-stress situations and achieve goals on time and under budget.

## EXPERIENCE

June 2017 – Now

**Lead Developer** • VIA Creative • Middlesbrough  
Junior Web Developer: June 2017 – Aug 2018

Developer duties included:

- Bespoke, mobile-first, web development for an array of clients in different sectors
- Bespoke web application development utilising the Laravel PHP framework
- Native mobile app development using React Native & NativeScript
- Development of ecommerce websites using WooCommerce
- Extensive cross-browser and cross-device testing of all websites we build prior to launch
- Database (MySQL) design and system architecture
- Linux server provisioning and management for web hosting
- Maintenance of existing, legacy websites and systems
- Mobile application development using React Native
- Technical & system training for clients, individually and groups

Lead developer duties included:

- Mentoring and management of a team of developers and liaise with the design team
- Meet with prospective clients to help determine the best solution to their problem
- Project management for our various web and app projects
- Project discovery meetings for new clients
- Producing written proposals following requirement gathering meetings
- Creating and implementing internal processes, systems and documentation
- Handling code reviews on pull requests from other team members
- Coming up with accurate time and cost estimates based on client specifications
- Setup and management of internal computing systems and networks

Aug 2015 – Sept 2016

**Web Developer** • MMCreative • Castle Eden, Co. Durham

- Working together with the project manager and designer to create a website that will be attractive to the target user, has a logical navigation system and has all the features required.
- Creating features and websites using a combination of languages (HTML5, CSS3, PHP, JavaScript, Bootstrap) and using various content management systems.
- Used a custom in-house developed PHP framework to develop most sites.
- Used local development tools and environments such as Vagrant and Virtualbox for testing and development.

Sept 2012 – Jan 2013

**Digital Programmer** (Intern) • Green17 • Belfast

- Working in a team of 3 to produce a design that will be attractive to the target user, has a logical navigation system and has all the features required.
- Writing web pages in a combination of codes (HTML5, CSS3, JavaScript, jQuery, PHP) and using various content management systems.
